

ARTISAN® SEWING MACHINES

Economy Upholstery
STITCHING MACHINE
with a DC Electronic Servo Motor

5550 BIG

SR-2 Speed Reducer

The New **ARTISAN® 5550 BIG** LTHR Upholstery and Leather Stitching Machine is designed for stitching light weight upholstery fabrics on an occasional basis. The machine uses a roller type presser foot and fittings set which enables the operator to stitch over heavy seams with little friction on vinyl, leather, and upholstery type fabrics. The **5550 BIG** machine includes a "Big Bobbin" size rotary hook and bobbin with a reverse mechanism for locking in or back tacking your seams. A pressurized automatic oiling system is included and insures that your machine is properly lubricated. The machine is very quiet and easy to use.

Typical usage of the **5550 BIG** LTHR includes stitching Hot Rod interiors and tops, tonneau and car covers, awnings, and sun umbrellas, and smaller banners, signs, and hemming Jeans. If the fabric fits under the presser foot, and is less than 5/16" compressed, you will likely be able to sew it. **ARTISAN®** recommends using a quality bonded nylon or poly upholstery thread from size z-46 up to size z-138.

The **5550 BIG** LTHR **ARTISAN®** includes a 2 speed ball bearing SR-2 speed reducer to help control your stitching torque and sewing speeds along with the amazing ACF-500 C DC Electronic Servo Motor. This is one of the easiest and most controllable stitching machines you'll ever sew on.

Contact **ARTISAN®** for additional details.

- Automatic Lubrication with a Pressure Oil Pump.
- Large "M" Big Bobbin Rotary Hook.
- Uses Prewound Paper or Standard Metal Bobbins.
- Sews Multi-ply Fabrics and Leather up to 5/16"
